

OneOrbit™ Corporate Collaborative Non-Profit Option

[Click Here for the OneOrbit Video!](#)

For companies preferring a non-profit option, OneOrbit partners with The Houston Association for Space and Science Education (HASSE), a 501(c)(3). Through this partnership, OneOrbit runs corporate programs, together with multi-school programs. Included is an optional astronaut presentation to the local community, to build relationships and community presence. Corporations will have the opportunity to support education initiatives and provide motivation to their workforce and community.

OneOrbit supports schools and communities by addressing critical issues in education related to bullying, student attitudes and behaviors, diversity, and poverty. Our School Program motivates young people to overcome obstacles and mediocrity to find the courage to follow their dreams. But the OneOrbit Mission does not end there. We use space to emphasize the importance of planning and striving, all while engaging the imagination. OneOrbit exposes students to the exciting sides of science, mathematics, and technology to allow wonderment to overcome fears and insecurity about these subjects. OneOrbit is building a community of intellectual innovators who will find personal power and freedom through the inspiration of space exploration.

Corporations have the opportunity to support education initiatives and provide motivation to their workforce and community. The program can be customized to fit specific mission and community needs. Custom programs can implement a variety of options, including:

- Bully Prevention/Cyberbullying
- STEAM (Science, Technology, Engineering, Arts, and Mathematics)
- Leadership/Ethics
- 21st Century Skills
- Diversity (developing an inclusive school environment)

This is a winning program for everyone- schools, corporations, and the community!

Make the Most of Your OneOrbit!
